HTML5, CC3, JavaScript, ReactJS, mySQL, MongoDB, NodeJS, Firebase, ACCULOG, ACCUMAP, AutoCAD, SolidEdge, PipeSIM, CMG, MATLAB, MS Office Suite

PROFILE

I am an ambitious Full Stack Engineer with an educational background of Petroleum Systems Engineer and a record of providing innovative technical solutions. As a believer of constant growth through the development of skills, I have decided to pursue web application development. In doing so, I believe the problem solving skills acquired through my engineering program coupled with the knowledge and creativity of a web developer, will allow me to reach great heights in the tech world.
