PROFILE

I am a technology enthusiast at heart pursuing a career in Web Development utilizing my record of providing innovative technical solutions. Ever since I got my first computer, I was obsessed with understanding its inner workings. I believe that my values of constant growth through the development of skills, coupled with creativity and ingenuity, will allow me to succeed in a Web Development role.

WORK EXPERIENCE

Front End Developer at Avondx, Toronto
September 2021 — December 2021

- Developed code through TypeScript and frameworks like React.js to convert design wireframes into website elements.
- Added to company database of code by developing reusable code that could minimize the time needed to complete projects in the future.
- Ensured scalability of front-end elements by optimizing them for loading speed and performance.

Student Software Developer at ProntoShop, Toronto
June 2020 — September 2020

- Revised, modularized, and updated old code bases to modern development standards, reducing operating costs and improving functionality.
- Collaborated with a cross-functional 3-member team on features, designs, and implementation.
- Assisted senior developers in designing web applications and gained skills in aligning designs with client requirements.

EDUCATION

Petroleum Systems Engineerings - BASc, University of Regina, Regina
January 2016 — April 2021

- Minors in Software Systems Engineering

Diploma of Web Development, BrainStation, Toronto
June 2021 — September 2021

- Skills - React, Node, HTML, SASS, Responsive Design, Git

PROJECTS

Omega | Front-End Application

A fully responsive website that navigates users through Swedish-designed German-made furniture. Built with React and features animation concepts & custom CSS.

- https://omegadesigns.netlify.app/

BestBeats | Front End Application

A fully responsive front-end application that is a one-page e-commerce concept website. This application features animations and a sleek design that is built using JavaScript techniques.

- https://bestbeatsnow.netlify.app/

StudioGlam | Full Stack Application

A Full-stack MERN easy-to-use e-commerce application developed using of React-Redux, React-Bootstrap, and JWT Authentication!

- http://studioglam.herokuapp.com/

Instock | Full Stack Application

A team-oriented project that used an Agile Methodology to create CRUD Inventory application and developed using React and NodeJS to allow users to input, edit, and delete information.
